

Guidance of algae-proof and antimold agent for a constant temperature water tank

Dear Gas corrosion testing machine handling person in charge

Thank you for always using our gas testing equipment habitually.

Does algae, mold outbreak of the pure water which is necessary for humidification not include having a problem while I have you usually manage a device?

I recommend a algae-proof and antimold agent for constant temperature water tank to a visitor having a problem.

Algae-proof and antimold agent for a constant temperature water tank AZ-1000

- For 50L
- Inhibit the growth and development and proliferation of bacteria, microorganisms of constant temperature water tank such as a water bath, to prevent the occurrence of algae and mold.
- Safety with oral toxicity test and the like has been confirmed.
- It keeps beautiful water tank.
- To be used by the addition of 20mL water per 10L.
- Hardly be resistant bacteria for complex medicament, and because it is chemically stable, the effect lasts long.
- Component PHMB (Polyhexamethylene biguanide) etc
- Internal capacity 100ML
